SEAN MARCUS V. TOMAS

Baliwag City, Bulacan (Willing to relocate)
Mobile No.: +63 915-682-0657
Viber: +63 992-387-3712
Email: seanmarcus.tomas03@gmail.com

PROFESSIONAL SUMMARY

Computer Engineer with hands-on experience in full-stack web and cross-platform mobile development through academic and personal software projects. Experienced in building database-driven applications and REST APIs using Python, PHP, JavaScript, TypeScript, Vue.js, FastAPI, Flutter, and MySQL, including systems with authentication, role-based access control, attendance management, and automated participant check-in. Familiar with the software development lifecycle, software testing, debugging, and defect identification, with additional experience in computer vision, embedded systems, Raspberry Pi, and Linux. Strong analytical, problem-solving, leadership, and teamwork skills, seeking a junior software or web development role where I can contribute and grow as a software engineer.

TECHNICAL SKILLS

Programming Languages: Python, PHP, JavaScript (ES6+), TypeScript, Dart, Java, C++
Web Development: HTML5, CSS3, Vue.js 3, Vue Router, REST APIs, Fetch API, FastAPI, Apache, XAMPP
Mobile Development: Flutter, Dart, Android Development
Databases: MySQL, SQL, Database Design, Database Normalization, Foreign Keys, PDO
Software Testing & QA: Manual Testing, Functional Testing, Integration Testing, System Testing, User Acceptance Testing (UAT), Debugging, Defect Identification, System Validation
Security & Application Development: Authentication, Session Management, Password Hashing, Role-Based Access Control (RBAC), CSRF Protection, Brute-Force Prevention, Secure API Development
Embedded Systems & AI: Raspberry Pi, Arduino, ESP32, Linux, Computer Vision, Image Processing, Edge AI
Development Tools & Platforms: Git, GitHub, Visual Studio Code, Windows, Ubuntu Linux, Render, Microsoft Office

PROJECT EXPERIENCE

Elevate-YSF Web Management Information System — Personal Project, In Progress
Vue.js, JavaScript, PHP, MySQL, REST APIs

- Developed a full-stack system for participant management, event scheduling, attendance, and automated check-in.
- Implemented authentication, RBAC, CSRF protection, password hashing, and REST-style PHP APIs with PDO.

Elevate YSF Basketball App — Personal Project
Flutter, Dart, Python, FastAPI, SQL

- Developed a cross-platform app with QR check-in, skill registration, attendance tracking, and team balancing.
- Built and deployed a FastAPI backend with REST API and SQL-based data management.

Edge AI Driver Monitoring System — Capstone Thesis
Raspberry Pi, Linux, Computer Vision, Git

- Developed a real-time driver fatigue and distraction monitoring system using EAR, MAR, head pose, eye gaze, and blink analysis.
- Integrated Raspberry Pi hardware and performed testing and validation throughout the SDLC.

INTERNSHIP EXPERIENCE

Computer Engineering Intern – Pre-Sales Engineer
Nimbus Technologies Inc. | Makati City, Philippines | Jun 2025 – Aug 2025

- Assisted with installation, configuration, testing, and maintenance of desktop computers, biometric systems, and servers.

- Performed system validation, preventive maintenance, technical inspections, and troubleshooting of deployed equipment.
- Prepared technical documentation and reports and assisted with product demonstrations and technical training.

EDUCATION

Bulacan State University – Bustos Campus
Bachelor of Science in Computer Engineering | 2022–2026

Academic Scholar | Class Mayor, 2023–2026
Capstone Thesis: *Design and Development of an Edge AI-Based Driver Monitoring and Intervention System for Real-Time Alertness Evaluation*

CERTIFICATIONS

- Fortinet Certified Associate — Fortinet (2025)
- DHCA – DoLynk Cloud Management System Certified Engineer — Dahua (2025)
- Microsoft Places Technical Solutions Professional — Microsoft (2025)
- Microsoft Teams Rooms Solution Sales Professional — Microsoft (2025)
- HCIA AI-V4.0 — Huawei ICT Academy (2025)
- Computer Vision Onramp — MathWorks (2025)
